

## Getting Involved

## Building a Sustainable Home

Building a sustainable, connected home requires a multi-disciplinary approach to the problem and topic of sustainability. The MIT Mobile Experience Lab and the Fondazione Bruno Kessler are interested in partnering with other research institutions and organizations.

The project takes a holistic approach to green design, integrating urban planning, sustainable architecture, renewable energy, smart transportation, and the poetics of daily life to bring a vision of ecological sustainability to life.

**alliance**  
**MEL FBK**

The MIT **Mobile Experience Lab**, within the Design Laboratory, signed a three year strategic alliance with the **Fondazione Bruno Kessler**, promoted by the Autonomous Province of Trento, Italy, on July of 2008.
